

Can you help rebuild lives?

Adult Social Care – Older People and Physical Disability

In adult social care, it is not always easy to see the person behind the issues. But at Kent County Council, we believe the way to offer the right support, in the right way, at the right time is to really get to know people.

Assessment is a vital step, ensuring older people and people with physical disabilities have access to the support and resources they need. We want them to lead fulfilling and, where possible, independent lives.

We have the time and resources to do this because we've redesigned the way we work – with each other, with technology, and with our partners and providers. Now with an emerging agenda to integrate health and social care services, our operation is smarter and more efficient than ever before. That means more accessible, responsive services for the people who need them, including a seven-day service. It also means more manageable workloads, regular supervision and tailored development for you.

If you are a registered Social Worker, Occupational Therapist or Nurse with experience in Adult Social Care then we would love to hear from you.

We are looking for experienced professionals and people embarking on a career change, or returning to work, to join us who are committed to working in integrated teams, ready to embrace change and new ways of working.

"The variety of the role is key to me. I work within an integrated role in an acute setting and enjoy seeing the bigger picture. I like the level of responsibility I have within my role and enjoy problem solving."

Arti Vyas, Senior Practitioner, Ashford
